

About

Nolimit consists of a team of experienced professionals from the gambling industry, located in Stockholm, Sweden.

Our company has its roots in more than 10 years of hands-on work at some of the most successful gambling software providers and operators. Our mission is to take gambling software to the next level by offering a fast, reliable and flexible team that cooperates with a set of solid operators.

Our biggest advantage is our comprehensive and portable system platform for mobile, tablet and desktop devices which is 100% controlled by us. Since we aren't dependent on any other systems, we can deliver special features and smooth, customizable marketing campaign tools that are tailored to each operator's specific needs.

We think the time is right to give the gambling software industry a new perspective. It's time to focus on the operator and fully engage our games with their promotions and marketing campaigns, and also their country managers' activities.
